The Garden Bug Peonies

These garden favorites are usually sold as bare-root tubers. For planting, pick a sunny spot with good drainage, and work some organic matter and a cup of bonemeal into the soil. Place the root in a hole about 2 inches deep (if planting in southern states, only 1 inch deep), and cover with soil, tamping gently. Water well. Plant peony tubers in late September or October, or about six weeks before the ground freezes. Peonies take years to fully develop, and may need support stakes.
